CHAIRMAN

POINTS OF DISCUSSION:

1. About B.Tech First year I & II Semester Course structure and Syllabus of SRK-23
2. About M.Tech First and Second year I to IV semesters Course structure and Syllabus of SRK-23. Under this, modifications in Advanced Data Structures & Algorithms Lab, Mean stack Technologies Lab, Machine Learning and Cloud Computing Theory subjects.
3. About Open electives offered by M.Tech program to other branches which are having M.Tech program.
4. About the detailed Course- Contents of IT Lab - I & II for MBA I & II Semesters, Fundamentals of computers - Integrated MBA I Semester, Decision Support Systems - Integrated MBA VI Semester

RESOLUTION:

1. About B.Tech First year I & II Semester Course structure and Syllabus of SRK-23.

As per the suggestions of Dr.A.Krishna Mohan, University Nominee and the two subject experts Dr.M.Kamala Kumari and Dr.B.N.Jagadesh, for Computer Science and Engineering and allied branches of CSE in the SRKIT College (Artificial Intelligence and Machine Learning, Data Science), JNTUK proposed Course structure and Syllabus is approved.

2. About M.Tech I and II year I to IV semesters Course structure and Syllabus of SRK-23.

i. University Nominee, Dr.A.Krishna Mohan, suggested to add two experiments to the existing experiments of Advanced Data Structures & Algorithms Lab which comes under I year I semester. The two experiments are implementation of searching algorithms and sorting algorithms. These two are added as experiment 10 and 11 in the syllabus.

ii. External subject expert Dr.B.N. Jagadesh suggested that club the first two weeks experiments and make it as single week so that newly added experiments have sufficient time to execute.

iii. University Nominee Dr.A.Krishna Mohan, suggested that change the unit V contents to unit IV in Machine Learning subject in the I Year II semester and add two new topics namely Ensemble Methods and Random Forest Algorithm as these two topics are useful for analysis and research.

iv. University Nominee, Dr.A.Krishna Mohan, suggested to add PHP,Servlets and JSP in MEAN Stack Technologies theory subject. Based on these additional topics lab experiments are involved in the Mean stack technologies lab of I year II semester.

v. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to add A case study of Web Hosting in AWS,AZURE platforms and implementation of deployment and development of static site in the Cloud Computing subject of I year II semester. The added topics are useful to drive the students to the current trends of cloud computing.

vi. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to add Speech Recognition, H2O.ai, Deep Learning Kit in the v unit of Deep Learning subject of II year I semester. The reason to add the new topics are because we can implement speech recognition application using deep learning models. Sparse coding is a class of unsupervised methods, not the area of application. H2O.ai, Deep Learning Kit is Introduction to Deep Learning tools as they are latest tools. It will benefit to students who learn the latest tools in Deep Learning.

vii. University Nominee, Dr.A.Krishna Mohan, and the two subject experts suggested to change the subject in the open electives. In place of Next Generation Databases add MongoDB subject as the other branch M.tech students are not aware of database concepts.
